Procedure

The Real Estate Cure is used when trying to sell a house or business. Of course, it is important that the property is priced right for the market. Correct pricing is the mundane step. This cure is the transcendental method to move energy in the direction of a successful sale.

- Take a piece of the house, i.e. a switch plate screw, nail, piece of tile, etc. from either the kitchen or foundation of the building. Something that can be easily replaced.
- Place the item in a red envelope with a little soil from the yard or property and carry it to a nearby river or stream. Toss the envelope into the stream. Best performed between 11:00 am and 1:00 pm.
- As you toss the envelope, perform the Three Secrets Reinforcement. Visualize that the envelope floats downstream and is retrieved by someone and that it is the person or persons who are looking to buy your property. Visualize a win/win situation for both parties. Everyone gets what they want, the transaction goes smoothly and the outcome is positive for all involved.
- Just after escrow closes and you are about to vacate, replace the piece that was removed with a new piece so the house is complete.
- If business use something from break room or employee lounge...where you eat or drink.
